The groundbreaking first generation Alien Life in Vitro Experiment (ALIVE) was a dream come true. The second and third are complete nightmares . . .

Reports of unknown objects in the sky date back hundreds of years. But since the early twentieth century, the frequency of those reports has increased dramatically. To combat the alien threat they see looming on the horizon, the US government initiated the A.L.I.V.E. (Alien Life In Vitro Experiment) Project.

Working from Wright Patterson Air Force Base, Dr. Maeve Leander has been in charge of Alvie, the first subject from the A.L.I.V.E. Project, for the last three years. But she's been part of the project much longer—ever since she was a child and her mother ran the project. But Alvie is more than just some experimental subject. He's family, the only family Maeve has left.

When a new agency takes over the A.L.I.V.E. Projects, though, Maeve learns that Alvie wasn't the only subject created. Caught in the middle of a giant war game, Maeve ends up in a race for her life. But this time it's not just humans who are the combatants.

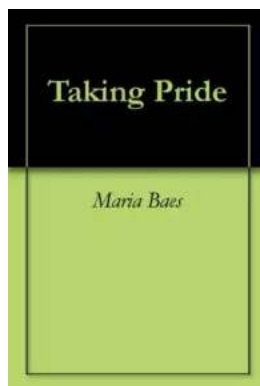

As the violence increases and the chances for survival decrease, she realizes one terrifying truth: despite its name, the real goal of the projects is to make sure no one gets out alive.

Fans of Douglas E. Richards, Michael Crichton, and E.T. will love the A.L.I.V.E. Series!

What Readers are Saying:

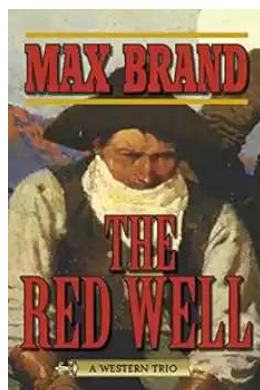

“Loved it! Can't wait for the next book! Loved it, Loved it! Killed it!”

“When I read the description for this book, I wasn't sure I wanted to read an "alien/UFO" story. But then I remembered how much I enjoyed reading Hominid, which is also about a subject I wasn't sure I wanted to read. So I made the purchase and read the book, and I learned that I apparently do enjoy reading "alien/UFO" stories, at least when Brady writes about them!”
