Dwarf hamsters are really a variety of little species of hamsters that are endemic to desert places all over the world, with the majority of them being found in Africa. These gregarious tiny critters are distinct from their bigger, more territorial counterparts in that they prefer to live in couples or small groups rather than on their own. Their basic demeanor as pets is that they are calm and simple to handle. They are also entertaining to watch as they tunnel and play around in their habitat. Their upkeep is extremely uncomplicated, necessitating only a relatively simple feed and routine cage cleaning on a regular basis.

Overview of the Species

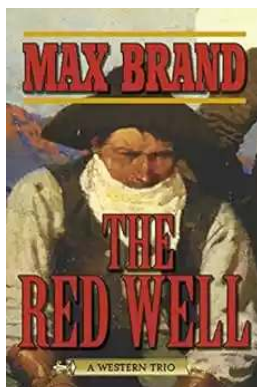

Common names for dwarf hamsters include Campbell hamster, Robo (Roborovski) hamster, Syrian hamster, black bear hamster, and Chinese hamster, to name just a few examples.
